

Landscape Architect Chosen
September 14, 2012

The interview team (Dianne, Umesh, Karin, Sheldon and Jean) decided that Marcel Wilson and Sarah Moos from Bionic are the best fit to work with us on our Potrero Gateway Park Project.

Our plan consists of the 3 stages below:

Stage 1: Get Started

- Pro-Bono help as we work together to create a 5 page document that we can use to solicit seed money for Stage 2

Stage 2: Work on Design

- 2-4 meetings with neighborhood to come to consensus on a Master Plan for Potrero Gateway Park
- Master Plan with 3D views strategically constructed
- Design that involves greening as well as traffic calming

Stage 3: Constructions Drawings for Implementation

- Drawings for Caltrans and DPW
- Drawings for contractors
- Drawings for volunteers

We will be working with DPW and the SF Parks Alliance, our partners in this project.
